PRODUCT LEADER · OMNI-CHANNEL BANKING, PAYMENT INFRASTRUCTURE & AGENTIC AI

olabode.ogunfuye@gmail.com · +234 810 069 4808 · linkedin.com/in/olabodeafrica · olabode.africa
Lagos, Nigeria · Open to remote and relocation

PROFESSIONAL SUMMARY

Product leader with 12 years building and commercialising banking, payments, and government technology across six African markets — Nigeria, Kenya, Tanzania, Liberia, Sierra Leone, and São Tomé and Príncipe. Owns the OMNI Channel banking suite at Inlaks, delivering retail and corporate internet banking, WhatsApp and voice banking, paperless operations, and CRM to multiple banks as a single platform, and builds the public payment infrastructure beneath it — government revenue collection, Treasury Single Account systems, and interbank interoperability across ACH, RTGS, and national switch rails. Designed Account Mapper, the account-validation layer adopted by the Central Bank of Liberia and integrated across nine commercial banks. Pairs that institutional depth with zero-to-one execution as embedded Head of Product at Innkorp, a know-your-business verification platform, and API product lead at Pierflow, where agentic extraction pipelines turn paper records into standards-compliant health data. Strong in agentic AI workflow design, product pricing and packaging, and multi-year roadmap management; leads cross-functional teams of 12–20. Holds a Lean Six Sigma Black Belt, Professional Scrum Master I (PSM I), and a First Class Honours degree in Computer Science.

CORE SKILLS

Banking & Payments: OMNI Channel Suite (Retail, Corporate, WhatsApp, Voice, Paperless, CRM) · Core Banking Integration · ACH / RTGS / National Switch Interoperability · Government Payment Infrastructure · Revenue Collections · Treasury Single Account (TSA) · Account Validation & BBAN · Reconciliation · Fraud & Exception Handling · Multi-Country Deployment & Localisation · Central Bank & Regulatory Engagement

API & Platform: API Product Management · Partner API Contracts & Versioning · Webhooks & Delivery Guarantees · Payload Encryption & Consent · Developer Experience & Documentation · Embeddable Widgets & SDKs · FHIR R4 · Systems Integration

AI & Agentic Systems: Agentic Workflow Design · Model Context Protocol (MCP) Tooling & Connectors · Large Language Model Extraction Pipelines with OCR Fallback · Human-in-the-Loop Review Design · AI-Native Product Strategy · AI-Assisted Delivery

Product & Commercial: Product Strategy · Roadmap Management · Pricing & Packaging · Revenue Modelling · OKRs · Zero-to-One Builds · SaaS & Product-Led Growth · Know-Your-Business (KYB) & RegTech · Change Management & Adoption Design · Lean Six Sigma (Black Belt)

Tools: Jira · Confluence · Linear · Figma · Miro · Power BI · Tableau · Microsoft Clarity · Python · SQL · Azure · Git

EXPERIENCE

Lead, Banking Product Management & User Experience — Inlaks Limited, Lagos, Nigeria
Full-time · January 2020 – Present

- **Own the OMNI Channel banking suite end to end:** retail and corporate internet banking, WhatsApp banking, voice banking, paperless branch operations, and CRM delivered to banks in Nigeria, Kenya, Tanzania, Liberia, and Sierra Leone as one platform — covering strategy, roadmap, pricing, multi-bank and multi-currency localisation, core banking integration, user acceptance testing, and post-deployment adoption in each market.
- **Designed Account Mapper, the national account-validation and BBAN layer adopted by the Central Bank of Liberia** under the World Bank-funded LIFT-P programme: defined the Ingress and Name Enquiry API contracts, versioning and acceptance testing, integrated it across nine commercial banks, and had the architecture reviewed against digital public infrastructure standards. Closed $400,000 of revenue leakage from payment errors and fraud and secured the central bank contract.
- **Build government payment infrastructure and interbank interoperability:** scaled CPay from a single country to five government agencies across Liberia and Sierra Leone for over $1M in revenue, and delivered Treasury Single Account systems linking ministries into ACH, RTGS, and national switch rails for Sierra Leone's Ministry of Finance.
- **Own pricing and multi-year roadmap across the portfolio:** set commercial packaging by bank tier and market, sequenced the roadmap across six product lines, and repositioned Sierra Leone's Audit Management Information System from a one-off build into a multi-tenant SaaS platform carrying a $30M five-year revenue plan.
- **Led the health insurance management build for SUNU Health** across 17 countries, driving requirements from direct observation of client-facing operations rather than written briefs.
- **Direct cross-functional teams of up to 20** with very low turnover; built the adoption playbook — super-user networks, onboarding on real transaction types, 30-day post-launch cycles — and an internship pipeline that added capacity without raising headcount cost.

Head of Product (Embedded) — Innkorp, Lagos, Nigeria
Consulting engagement · June 2026 – Present

- **Lead product for a know-your-business (KYB) verification platform** that registers companies with Nigeria's Corporate Affairs Commission and stores the resulting records in a business-owned vault, reusable for bank and fintech onboarding under itemised, revocable consent.
- **Own the partner API surface:** handoff contracts, payload encryption, webhook delivery guarantees, API request logging, and an embeddable "Verify with Innkorp" widget, with developer documentation that makes integration self-serve.
- **Drove integration and commercial packaging with fintech platforms including PiggyVest,** from proposal through signed service-level agreement and demo runbook, and took the platform to merchant banking partners.

API Product Manager — Pierflow, Lagos, Nigeria
Contract · January 2026 – Present

- **Architected an API-first healthcare connectivity platform:** Records API, Insurance Distribution API, hospital management system (HMS) integration layer, and a Fast Healthcare Interoperability Resources (FHIR) R4 standardisation pipeline connecting insurers, hospitals, fintechs, and payers through one canonical API.
- **Designed the agentic extraction pipeline behind the Paper-to-Digital engine:** multimodal large language models as primary extractors with optical character recognition fallback, confidence thresholding, and human-in-the-loop review, targeting 6,000 FHIR-ready records per day from scanned and handwritten sources.
- **Led partnership development at World Health Expo Lagos 2026:** ranked 150+ exhibitors, built a structured partnership playbook, and converted a live partner pain point into a pilot agreement, with Healthcare Federation of Nigeria, SYNLAB, GE Healthcare West Africa, PharmAccess, and SANeForce in active conversation.
- **Defined the embedded insurance distribution model,** placing affordable health plans inside fintech and banking apps through a single API; presented to the Africa Health-Tech Accelerator (co-hosted by Africa CDC) and Accelerate Africa.

Product & Growth Manager — SpireCore (Taxspire), Lagos, Nigeria
Contract · October 2025 – May 2026

- **Expanded the business model from tax filing alone into know-your-business (KYB) services for corporates:** added Corporate Affairs Commission company registration and statutory filings alongside tax compliance, which became the platform's fastest-growing revenue line within its first months of trading.
- **Built Nigeria's first digital-first tax compliance platform from zero:** five live modules — tax registration, business registration, invoicing, advisory booking, and tax clearance certificate retrieval — shipped in six months with a two-engineer team.
- **Designed the end-to-end compliance journey so each module cross-sells into the next,** and drove product-led growth through behavioural analytics, WhatsApp-to-platform migration flows, and advisory bookings embedded at highest-intent moments.

Product & Transformation Lead — Porchplus, Lagos, Nigeria
Contract · January 2020 – May 2025

- **Delivered the property-management MVP across web and mobile,** establishing market presence and onboarding multi-unit landlords within the first year.
- **Designed a multi-channel rent collection system** across WhatsApp, SMS, email, and in-app, integrated PiggyVest wallet APIs to keep payments on-platform, and standardised property onboarding and tenant management workflows for multi-market scale.

Product Manager — Vatebra Limited, Lagos, Nigeria
Full-time · April 2016 – December 2019

- **Led all phases of Health Management Information System (HMIS) development,** from discovery through regulatory sign-off and launch, with legal and clinical teams on local and international health compliance.
- **Implemented continuous integration and delivery (CI/CD) with Jenkins,** cutting release turnaround by 40% across multiple deployment environments.

Business Analyst — Parkway Projects Limited, Lagos, Nigeria
Full-time · December 2014 – March 2016

- **Analysed market trends and user requirements** to identify product enhancements, authoring business requirements documents and functional specifications that reduced downstream defects.

ADVISORY

Product & Venture Advisor — Luminevent, Lagos, Nigeria · *2023 – 2026*

- End-to-end product advisory for an event-technology platform: MVP scope, UX decisions, pricing, and early go-to-market, in structured weekly syncs with the founder.

EDUCATION & CERTIFICATIONS

BSc Computer Science, First Class Honours — Crawford University, Nigeria · *Graduated October 2013*
Valedictorian, Department of Computer Science (ranked first in graduating class).

Professional Scrum Master I (PSM I), Scrum.org — 2023
McKinsey Forward Programme, McKinsey & Company — 2022
User Experience Design, Accenture — 2022
Enterprise Design Thinking Practitioner, IBM — 2020
Certified Lean Six Sigma Black Belt, LSSBC (APMG) — 2019
Financial Modeling & Valuation Analyst (FMVA), CFI — in progress

SELECTED ACHIEVEMENTS

- **First Runner-Up, Lagos Digital Health Innovation Challenge (2026):** championed Pierflow's entry and led the team to a top-three finish with Pierflow Lens in a challenge convened by the Lagos State Ministry of Health, winning a ₦500,000 innovation grant.
- **3× Google Grant Award Winner (2017–2019):** as Programme Manager for Codespark Foundation, coordinated Africa Code Week across schools, government agencies, and sponsors including SAP, securing $4,000 in annual sponsorship.
